**Subject:** Please give us a more thorough cleanup plan

Dear Administrator Gina McCarthy,

Please exercise your power to do more to live up to your stewardship responsibility by providing a more effective cleanup plan for fish and wildlife in Oregon!!

My request in detail:

Please eliminate the confined disposal facility which would create a permanent toxic waste dump in our river.

EPA should select Alternative G with additional dredging in areas of high human use, areas of high ecological value, and areas where there is high risk of re-contamination of the river.

EPA should set much clearer timelines and metrics for success including an explicit date by which Portland Harbor specific fish consumption advisories will be lifted.

EPA should select an alternative that allows all members of our community to eat fish safely from our river.

Your cleanup plan should include the heavily contaminated uplands as well as the heavily contaminated river.

EPA should do a much better job of addressing environmental justice issues, including reviewing and correcting significant deficiencies in its public engagement strategies for future phases of the Superfund process and delineating strategies for ensuring the jobs, economic benefits and other benefits associated with the Superfund process to the local community and particularly to communities such as Native Americans and other people of color who fish to eat and have been negatively affected by contamination in Portland Harbor.

Thank you.
